

## Supplementary Information Titles

*Please list each supplementary item and its title or caption, in the order shown below.*

**Note that we do NOT copy edit or otherwise change supplementary information, and minor (nonfactual) errors in these documents cannot be corrected after publication.**

Please submit document(s) exactly as you want them to appear, with all text, images, legends and references in the desired order, and check carefully for errors.

**Journal:** Nature Medicine

<b>Article Title:</b>	Potent Inhibition of Heterotopic Ossification by Nuclear Retinoic Acid Receptor $\gamma$ Agonists
<b>Corresponding Author:</b>	Masahiro Iwamoto

<b>Supplementary Item &amp; Number</b> (add rows as necessary)	<b>Title or Caption</b>
Supplementary Figure 1	Genotyping and isolation of RAR mutant limb bud cells.
Supplementary Figure 2	Analysis of proliferative cells.
Supplementary Figure 3	Tests of side effects.
Supplementary Figure 4	Analyses of bone structure and density.
Supplementary Figure 5	Analysis of retinoid effects on the osteogenic stage of HO development.
Supplementary Methods	[NO DESCRIPTIVE TITLE NECESSARY]
